Highly skilled and innovative Front-End JavaScript Engineer with a strong passion for crafting exceptional user experiences. Over 2 years of professional experience in building complex web applications using cutting-edge technologies, including React.js, HTML, CSS, and JavaScript. Proven ability to translate design concepts into responsive and performance-optimized interfaces. Adept at solving challenging technical problems and continuously expanding expertise in front-end development.

Work Experience

Front end developer
01/2022 to Present
GlobalHunt India
Noida

Spearheading the development of the "Video Interview Recruiter" platform, optimizing the user interface for efficient recruiter interactions.

Leading a team of developers, ensuring code quality, scalability, and adherence to best practices.

Collaborating closely with designers to transform wireframes and mockups into pixel-perfect, responsive web applications.

Leveraging React.js, HTML, CSS, Material UI, and Amazon Cognito to enhance user experiences and streamline the recruitment process.

Implemented Progressive Web App (PWA) features to improve the platform's accessibility and performance.

Conducting code reviews, and maintaining a high standard of code quality.

Created a client portal platform where users may access client information and adjust their job accordingly.

Worked on office add in project build solutions that extend Office applications and interact with content in Office documents.
